

+ HORSE CASINGS

Casings for the elaboration of sausages obtained from equine small intestine processed through rigorous manual procedures.

Basic Ingredient

Equine small intestine.

Preservative

Food grade sodium chloride, saturation at room temperature. Brine.

Presentation

Skeins (unit) of 8, 10 and 18 meters long.

Calibers

45 to 80mm range.

Unit weight

The weight of the skein is variable and is not an attribute considered for the commercialization.

Water Activity

AW= 0,75±0,3

Preservative Density

23±2 Baumé.

Product use

Ready to use casings for the sausage industry.

Expiration date

24 months from manufacturing date.

Primary packaging

Low density polyethylene bag.

Secondary packaging

Tight-fitting lids reinforced plastic barrels.

Conservation & Storage

Cool & dry environment (min. 1°C - max. 30°C).
